

Supplier name: QUIQSOLUTIONS Ltd

Publication date: 1/8/22

Commitment to achieving Net Zero

QUIQSOLUTIONS Ltd is committed to achieving Net Zero emissions by 2042.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021-22	
Additional Details relating to the Baseline Emissions calculations	
QUIQSOLUTIONS Ltd has collated emissions between August 2021 and August 2022 to set a baseline..	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO2e)
Scope 1	1
Scope 2	1.6
Scope 3 (Included Sources)	-
Total Emissions	2.6

Current Emissions Reporting

Reporting Year: 2021 – 2022	
EMISSIONS	TOTAL (tCO2e)
Scope 1	1
Scope 2	1.6

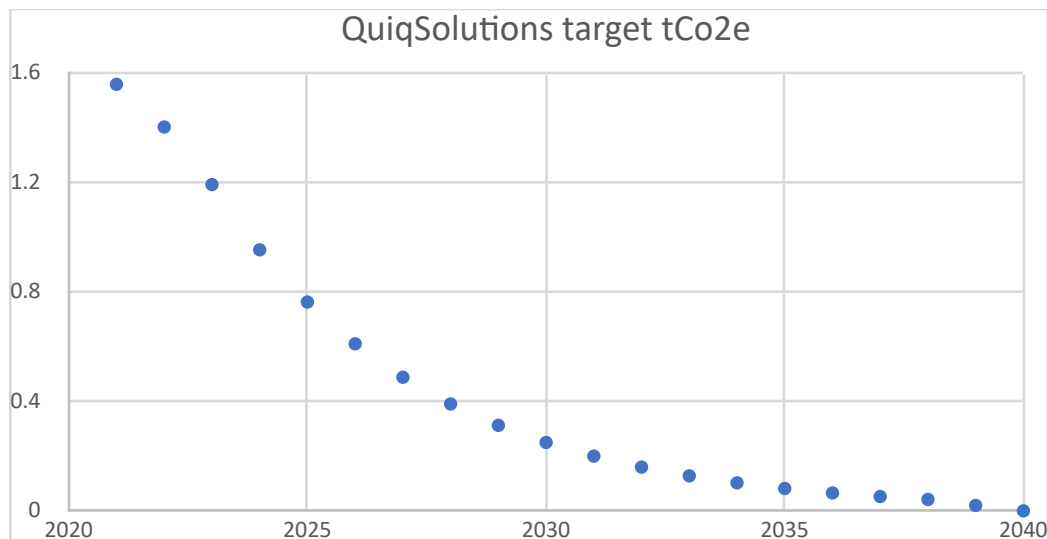

Scope 3 (Included Sources)	-
Total Emissions	2.6

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We will reduce our carbon emissions to achieve NetZero by 2042 and will put in place interim targets to ensure sufficient progress is made.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented to date, and the measures will be in effect when performing the contract. It is not possible to see what reduction in carbon emission the measures already taken have achieved as the current year is the baseline.

Carbon reduction initiatives implemented to date:

- Implemented 100% home working
- Implemented 100% virtual meetings

- Light sensors
- Turning off equipment/monitors/computers when not in use
- 98% paperless operation
- Online client meetings

In the future we hope to implement further measures such as:

- Review of appliances for energy efficiency
- Reduce to almost no business travel
- Increasing the adoption of electric company lease vehicles
- Creation of environmental champions across the business
- Sourcing energy from green energy suppliers
- Switch to LED lighting in all locations

Actions and measures for carbon reduction will be subject to review every 12 months as a minimum and this plan will be subject to republication on an annual basis.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
